

IMPACT OF HOME VISITING

By meeting families where they are, home visiting programs have demonstrated short and long-term impacts on the health, safety, and school-readiness of children; maternal health; and family stability and financial security.

Home visitors are able to meet with families in their homes and provide culturally competent, individualized needs assessments and services.

-National Home Visiting Resource Center, 2024

For more information about this and other Bureau of Family Health Programs, visit **PartnersforFamilyHealth.org** or call **1-800-251-BABY**.

The Maternal, Infant, & Early Childhood Home Visiting program is part of the Louisiana Department of Health, Bureau of Family Health. The program uses two evidence-based models to provide in-home support to families: Nurse-Family Partnership (NFP) and Parents As Teachers (PAT).

**THROUGH FAMILY SUPPORT AND COACHING,
THIS PROGRAM HAS HELPED MORE THAN 30,000 FAMILIES.**

PROMOTES HEALTHY BABIES:

- * Pregnant participants are more likely to access prenatal care and carry their babies to term.

- * Home visiting promotes caregiving practices like breastfeeding, healthy sleep practices nutrition, positive parent-child interactions, and responsive caregiving which have been associated with positive long-term outcomes related to cognitive development and child health.

-National Home Visiting Resource Center, 2024

PROMOTES SAFE HOMES AND NURTURING RELATIONSHIPS:

- * Home visitors teach caregivers how to “baby-proof” their home to prevent accidents that can lead to emergency room visits, disabilities, or even death.
- * Home visitors also teach caregivers how to engage with children in positive, nurturing ways, thus reducing child maltreatment.

-National Home Visiting Resource Center, 2024

HOW DOES HOME VISITING HELP FAMILIES IN LOUISIANA?

A LOOK AT OUR FAMILIES:

2,621

Families served in 2023

2,274

Children served in 2023

27,027

Home visits in 2023

Families Served by Region in 2023

PROMOTES OPTIMAL EARLY LEARNING

Home visitors offer caregivers timely information about child development and the importance of early childhood in establishing the building blocks for life.

Home visitors support caregivers in promoting parent-child interactions around reading and early language development which translates to **improvements** in children's early language and cognitive development.

HOME VISITING HELPS BABIES THRIVE

Babies of parents enrolled prenatally in a home visiting program had:

Better birth outcomes

Better rates of immunization

Better success with breastfeeding
